BSc Community and Public Service Management

Welcome and Introduction

Welcome and Introduction to BSc Community and Public Service Management

Welcome to BSc Community and Public Service Management delivered at City College Plymouth.

The BSc (Hons) Community and Public Service Management will enable students to develop their critical knowledge and understandings of; contemporary theory and practice regarding public policy; the historical backdrop to the development of public service provision; the policy and institutional environment within which these services are framed and contemporary issues and problems in community and public service management. We have identified key aims that act as a thread with which to bind the programme together. These aims are as follows:

1. To promote and encourage autonomous learners who are able and willing to take responsibility for their actions and who feel comfortable in complex and changing settings.
2. To develop learners who have a factual and conceptual knowledge of both public services as a whole, (in terms of theory, practice, policy and politics) as a specific, but not separate part of community and public service provision.
3. To facilitate learners to be able to take complex theories, practices and policies and apply a range of appropriate cognitive skills including research, problem solving, critical analysis and evaluation.
4. To enable learners to operate effectively as part of a team but also demonstrating and practicing ethically informed work that maximizes performance within and across a variety of contexts.
5. To promote and encourage reflexive, self-evaluating learners who are effective in terms of their interpersonal and communication skills.

This programme has been designed to equip you with the skills and knowledge base required to work in your chosen specialism or other graduate opportunities. It is also a platform from which you can undertake additional vocational and academic qualifications.

Distinctive Features of the Programme and the Student Experience

This programme has been specifically designed to focus on community and public service management, to ensure that students interested in a career in the helping professions, who want to make a difference in society, are equipped with the knowledge and skills needed to be successful in this ever-evolving sector. These developments include the expansion of opportunities in the voluntary and private sector and so while on the programme students will interact with a range of organisations to develop their academic understanding and build on their practical abilities.

Employability is a distinctive feature of this programme with the inclusion of optional modules and pathways to suit a more varied and internationalized student body. All the modules use a range of sector specific teaching, learning and assessment practices, which are relevant to prospective employers across the public, commercial, voluntary, and charitable sectors. The importance of the student experience is paramount in the delivery of this programme and this is supported by the close links and proximity to Plymouth University main campus. This enables student to engage with all the extra-curricular opportunities that are part of a modern degree and to develop that all important network of peers both within their subject specialism and in the wider 'Plymouth University family'.

The programme has been designed and is delivered by public sector experienced academics with excellent sector links, to ensure that graduates fully understand the complexity of the helping professions and have developed the appropriate skills and knowledge for a career across the public, commercial, voluntary, and charitable sectors or one of the multi-agency bodies associated with them.

Student feedback for the FdA Pubic Services at both programme and module level has been consistently very good, if not exemplary. This means that students who join us from one of Plymouth University's partner institutes can be assured of a robust set of teaching and learning experience.

A strong and consistent record of generating high quality teaching and learning activity, as indicated by External Examiner's reports.

Delivery that is designed to enable our students to combine full-time academic study with part-time employment, or voluntary work.

Delivery that is designed to support students transferring from Plymouth University partner institutions. With significant experience in supporting student in their transition to the top- up at Plymouth University, we are fully aware of the issues students face when transferring to a new institution.

Programme Intended Learning Outcomes

6.1 Knowledge and understanding

On successful completion graduates will have developed:

1. A systematic understanding of the historical, philosophical and contemporary knowledge base around community and public services and the inter-relationship with other fields of study. They should have developed an understanding of community services, public services and public management in depth.
2. The ability to identify complex problems in the field of community and public services delivery with flexibility and confidence. They should be able to identify, select, and use investigative strategies and techniques to undertake critical analyses of issues in community and public services, and evaluate the outcomes.
3. The capability to plan, undertake and communicate research in a variety of community and public service provision scenarios.

6.2. Cognitive and intellectual skills

On successful completion graduates will have developed the ability:

1. To sustain intellectual argument and debate drawing on historical, philosophical and contemporary perspectives around community and public service provision
2. To take complex theories, practices and policies and apply a range of appropriate cognitive skills including research, problem solving, critical analysis and evaluation

6.3. Key and transferable skills

On successful completion graduates should have developed the ability to:

1. Work effectively within a team, support or be proactive in leadership, negotiate in a professional context, and manage conflict. They should be able to seek to resolve conflict proactively.
2. Effectively use appropriate means of communication including new technologies.

6.4. Employment related skills

On successful completion graduates should have developed:

1. An awareness of personal responsibility and professional codes of conduct, and be able to incorporate this into their practice.

6.5. Practical skills

On successful completion graduates should have developed:

1. Skills and techniques as autonomous learners who are able and willing to take responsibility for their actions and who feel comfortable in complex and changing settings.
2. The ability to be reflexive and self-evaluating, and effective in interpersonal, communication and technology skills

Admissions Criteria, including APCL, APEL and DAS arrangements

The market for the *BSc (Hons) Community and Public Service Management* is comprised of three segments. First are students who have already achieved a Foundation Degree in Public Services at one of the colleges in the Academic Partnerships network. This is an approved progression route for these students and therefore they are automatically eligible to a place on the course. Second are students who have already achieved a Foundation Degree or an HND in Public Services from a college outside of the Academic Partnerships network. Third are students who have already completed levels 4 and 5 of a degree in a related subject and wish to transfer to a public service related top-up for their final year. Fourth are professionals from the community and public sector with relevant experience.

(APEL) Accreditation of Prior Experiential Learning and (APCL) Accreditation of Prior Credit Learning: This programme will comply with the standard policy on Advanced Prior Experiential Learning and Advanced Prior Certified Learning as defined in the University of Plymouth Academic Regulations. We would strongly encourage applicants who can demonstrate experience in working within the community and public services but who may not have the required formal qualifications.

The College welcomes applications from international students. Entry will depend upon receiving evidence of the required standard of; English language (ILETs 5.5), ability and copies of all certificates, which can be equated to a United Kingdom qualification. International applicants will be required to comply with UK Immigration legislation and should refer to the UK Visas and Immigration website for the latest guidelines and policies. Further guidance for International applicants is also available through the College Website and the International Admissions Policy

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

The module aims to equip the learner with the skills and confidence to plan and undertake an autonomous research project. On the successful completion of the research project the student will have demonstrated a range of research skills including autonomy, an awareness of personal responsibility, effective communication, ethical consideration and some key cognitive skills including problem solving and enquiry and analysis and evaluation.

ASSESSED LEARNING OUTCOMES:

At the end of the module the learner will be expected to be able to:

- Design and justify the contents of a personal research proposal.
- Demonstrate an awareness of ethical issues and obtaining ethical clearance in relation to conducting research.
- Analyse, interpret and critically evaluate study data in the context of current literature and contemporary topics.
- Discuss and appropriately communicate study design, data and outcome connotations to target audiences.
- Work with a degree of autonomy with minimal supervision to undertake an effective research project in in community and public services.

Summary of Module Content

Following current best practice, the module will have a small number of introductory lectures in Term 1. These introduce the students to the module and emphasise the core skill sets required to successfully complete the project. During this period, students will be required to hand-in a project proposal which will be considered by the module leader (who will also be their project supervisor providing support and guidance on all aspects of the project). Once this has been done, the student will be allocated a topic specialist who will provide topic specific support. The module emphasises the skills required of the student as an autonomous learner, be that practice, policy or theory focused and then demonstrating the confidence to plan and undertake an autonomous research project. This activity is guided by the supervision of one of the Community and Healthcare Team, but it will be made clear that the student is responsible for the day-to-day progress of the work. On the successful completion of the research project the student will have demonstrated a range of skills including autonomy, an awareness of personal responsibility, effective communication, ethical consideration and some key cognitive skills including problem solving and enquiry and analysis and evaluation.

SECTION A: DEFINITIVE MODULE RECORD. *Proposed changes must be submitted via Faculty Quality Procedures for approval and issue of new module code.*

MODULE CODE: CITY3012	MODULE TITLE: Understanding Addiction and Compulsive Behaviour
------------------------------	---

CREDITS: 20	FHEQ LEVEL: 6	JACS CODE: L510
--------------------	----------------------	------------------------

PRE-REQUISITES: None	CO-REQUISITES: None	COMPENSATABLE: Yes
-----------------------------	----------------------------	---------------------------

SHORT MODULE DESCRIPTOR:

This module allows students to explore addiction and compulsive behaviour, enabling professional practice to be applied with an increased understanding and awareness; nurturing a person-centred approach for care and intervention. Module content will include exploring factors impacting on individual well-being and behaviour (children, young people and adults), assessment methods, intervention, services and legislations. Understanding of addiction and compulsive behaviour will be developed from both a professional and services user perspective.

E2 (Clinical Examination)		A1 (Generic assessment)			
T1 (Test)					

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Public Services

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

This module aims to provide students with an opportunity to extend their understanding of addiction and compulsive behaviour to develop and refine support offered within various provisions and practice. This will include statutory guidance and support methods as well as considering society attitudes and the implications to support or person-centred care.

ASSESSED LEARNING OUTCOMES:

At the end of the module the learner will be expected to be able to:

- Analyse and substantiate key academic and conceptual theories and the methods used to identify signs and symptoms or diagnosis of addiction and/or compulsive behaviour
- Critically analyse the impact of lifestyle factors and events in relation to addiction and compulsive behaviour
- Critically assess current support and practice frameworks to determine levels of effectiveness in providing person-centred care
- Evaluate current literature and Government strategies in order to consider societal ethos regarding addiction and compulsive behaviour and speculate the implication to recovery or effective support

Summary of Module Content

The module will explore the definition and concept of addiction and compulsive behaviour. The various and complex factors will be investigated to identify and develop understanding of their impact on an individual's well-being and behaviour. The degree of impact will be linked to other domains, such as family, employment and physical health. Current support strategies will be examined and the effectiveness of each will be considered along with justification for adaptations or changes. Additionally literature, Government strategies and media will be examined to consider the implications to societal attitudes and ethos regarding addiction and compulsive behaviour and whether this affects the support provided.
